Region I
Superfund Support Section
Waste Management Division
J.F. Kennedy Federal Building
Boston, MA 02203-2211

Dear Ms. Anderson,

Thank you for your comments on the Final Draft Work Plan for Site Inspection, Naval Communications Unit, Cutler, ME. We appreciate your comments and will take them into consideration as we proceed with Site Inspection. However, our work plan was finalized in March 1991 and our contractor will be starting the SI field work within the next 2 weeks. (Copies of the Rough Draft SI Work Plan and the Draft SI Work Plan were forwarded for your review in August 1989 and November 1990, respectively. No comments were received.)

In an effort to provide adequate information for the Hazard Ranking System (HRS), we will have our contractor complete the HRS forms in accordance with the 40 CFR Part 300 dated December 14, 1990 which you forwarded to me.

We are scheduled to complete the SI field work in September 1991 and have the Rough Draft SI Report available for review in November 1991. We will continue to keep you informed of our progress at NCU Cutler.

Sincerely,

A. E. Haring
Head, Restoration Management Section
